

# Narmin Mahmudova

## Graphic Designer and Illustrator

### About me

I am a passionate graphic designer and illustrator with 8 years of experience in the field. My deep interest in design and fine arts has been a driving force since childhood. Despite graduating in Business Administration from the Azerbaijan State University of Economics, I pursued my passion for graphic design, teaching myself the craft and building a career in the creative industry.

I specialize in creating compelling brand identities, eye-catching posters, and unique illustrations. Recently, I have developed a strong interest in 3D design and have completed several junior-level projects in this area. I am constantly seeking opportunities to refine my skills and contribute to innovative design solutions.
